

## FILM & DIGITAL CAMERAS / **STABILIZATION**

### **STABILIZATION**

#### ***(Gimbal Stabilizers)***

##### **Glidecam HD-4000 Stabilizer System**

Three axis gimbal stabilizer for film and DSLR cameras weighing from 4-10 lbs. Features: quick release mount, fine-tuning plate adjustment, telescoping pole, expandable base, and handle grip.

##### **Steadicam Merlin Arm & Vest Kit**

Upgrade kit for the Merlin and Merlin 2 camera stabilizers. Fits body types from approximately 50 to 350 lbs, and secures by thin hook-and-loop fasteners.

##### **Steadicam Merlin Camera Stabilizer**

Lightweight, hand-held gimbal stabilizer. Features ergonomic three-axis control gimbal (for small camcorders up to 5 lbs), and creates smooth shots on the fly.

#### ***(Helicopter Mounts)***

##### **Tyler Bridge Plate w/Zoom and Focus Motors**

Focus and zoom control for Tyler Camera Systems' Middle Mount.

##### **Tyler Gyro-Assist for Middle Mount II**

Gyro-Assist package for Middle Mount II for increased steadiness.

##### **Tyler Middle Mount II**

Stabilization mount for shooting from the side of a helicopter.

##### **Tyler Minigyro Stabilizing Camera Mount**

Stabilizing camera mount system using 2-Kenyon K8 Gyros for flexible, multi-platform shooting (cars, motorcycles, boats, helicopters, etc.).

##### **Tyler Nose Mount II**

Forward fixed nose stabilizing mount for helicopter. Maximum camera weight, 39 lbs; 200° tilt.
